

# PHILIPS

## SpeechLive

## Experience the future of seamless dictation and transcription!

Revolutionize the way you create your documents with Philips SpeechLive - a full cloud dictation, transcription, and speech-to-text solution that allows teams to easily collaborate from voice recording to the final document.

### Why Philips SpeechLive?

- **Anywhere Access:** Access your dictations and documents securely while you are in the office, remotely, or on your smartphone, ensuring you're always in control.
- **Professional Security:** Rest assured, your data is protected with the highest security standards, including encryption of dictations and multi-factor authentication as well as Single-Sign-On options.
- **Effortless Integration:** SpeechLive is compatible with Philips and third-party recorders and dictation microphones. It also provides integration options with other systems.
- **Enhanced Productivity:** Boost your productivity with advanced speech recognition to turn recordings into text drafts.

### Try for free with 14 days full access!

- » Dive into the complete Philips SpeechLive experience at **no cost**, no payment details required.
- » **Add up to 10 users** to your trial to test workflows.
- » Get **200 free minutes of speech recognition** per user.
