

Your legal IT, Fully Managed

Spending too much time on IT tasks that fall outside the scope of your responsibilities? Dealing with recurring IT issues on a daily basis without adequate IT support can be a significant drain on your productivity, resulting in valuable time diverted from billable activities.

Take IT issues off your to-do list

Our managed IT services provide comprehensive support for a wide variety of day-to-day IT needs including **managing user accounts, updating workstations and maintaining servers, networks and Microsoft 365 services.**

Legal IT expertise

With over a decade of experience providing services to law firms, our specialists offer IT support with the utmost level of professionalism. We prioritize clear communication, timely support and bring a deep understanding of legal practice operations.

Tailored IT solutions

We offer solutions that can adapt to your industry's specific challenges and needs. Our highly responsive team can provide support both online and on-site, and has in-depth knowledge on applications and technologies you use throughout the day.

Data security

We employ robust security measures to safeguard your firm from cyber threats and help protect the confidentiality of your clients' data. We will work with your firm to help you comply with standard requirements for cybersecurity insurance and other regulations.

Why partner with TELUS Business?

Our experienced team delivers tailored IT solutions for Canadian law firms. We understand the intricacies and challenges that come with managing a law firm and offer customized infrastructure, virtual CIO services and strategic IT planning.

Connect with a managed IT specialist today to learn how TELUS Business can help with your evolving IT needs.
