

No one else brings it all together

For too long, the business of law and the practice of law have lived apart. Clio unites them both, covering everything from the first call to the final settlement.

Clio Manage

Cloud-based, legal AI practice management software that helps you run your firm, organize cases, and collaborate with clients—all from one place. Keep your firm on-track and deliver the service your clients want.

Manage AI

Manage AI works across the Clio platform to turn routine tasks into completed work. Court documents become calendar events, matter activity turns into client updates, and key tasks move forward, giving you fewer missed deadlines, and hours back each week for the work only you can do.

Clio Work

Clio Work connects your matters with the world's largest global law library to deliver cited research, analysis, and case strategy you can trust. With AI embedded directly into the work lawyers do every day, it interprets context, identifies what matters, and delivers reliable, verifiable results.

Clio Grow

The client intake and legal client relationship management (CRM) software that transforms the way you engage with potential and existing clients. Clio Grow lets you make the client intake process more efficient—and personal—while automating tasks and streamlining contact management.

Clio Draft

Accelerate your drafting process with AI-powered template building and a native Microsoft Word Add-in. Clio Draft allows you to build a custom library tailored to your firm's unique style while using sophisticated conditional logic to adjust clauses automatically.

MORE THAN JUST SOFTWARE

Clio provides best-in-class security, 24/5 customer support, and 300+ integrations with your favorite apps and tools. The global leader in legal AI technology, it is trusted by over 400,000 legal professionals in more than 130 countries worldwide.
